

Adharsh Suresh

Web Developer

I love to learn and create. I am really enthusiastic about combining learning with application and that is my basis for the love of coding. I am sure that my drive could be an inspiration for my team members and can contribute positively towards the growth of the organization.

Netlify Socket.io Cron jobs

PERSONAL PROJECTS

Todo List App

- Todo List App is a simple application that enables the user to list their tasks. It is implemented using the **MVC modality**. It is based mainly on **NodeJS** as server and uses **MongoDB** as database. It utilizes **Express** framework for routing and **Heroku** for hosting the app. It uses **EJS** for templating and **CSS** for styling.
- **Repo** : <https://github.com/adiada/ToDo-List-App.git>
- **Live Link** : <https://mern-todo-list-application.herokuapp.com/todo>

Realtime Chat App

- Real time chat App is a simple application for chatting personally or for multiple people in a common chat room . It is based mainly on **NodeJS**, **Express** and **Socket.io server** for backend and is hosted on **Heroku**. It uses **ReactJS** and **Socket.io client** for frontend which is hosted on **Netlify**.
- **Client Repo** : <https://github.com/adiada/react-socketio-chat-app-client>
- **Server Repo** : <https://github.com/adiada/react-socketio-chat-app-server>
- **Live Link** : <https://rs-chat-app.netlify.app/>

Friends List App

- Friends List App is a simple application for storing a friends list . It is based mainly on **NodeJS**, **Express** and **MongoDB** for backend and is hosted on **heroku**. It uses **ReactJS** for frontend which is hosted on **netlify**.
- **Client Repo** : <https://github.com/adiada/mern-friendlist-client>
- **Server Repo** : <https://github.com/adiada/mern-friendlist-server>
- **Live Link** : <https://mern-friendslist.netlify.app/>
